Samiappan. J.

JR. TESTING ENGINEER

Tamil Nadu, IN | +91 9566989122 | jsamijaya636@gmail.com

Objective

Experienced Test Engineer with 4 years of expertise in testing web applications. Capable of formulating test plans, performing tests, compiling reports, and automating processes using Agile methodologies. Drives organisational success and improves end-user satisfaction through effective bug tracking, test case management, and collaboration with cross-functional teams.

Experience

FULL Creative | Jr. Testing Engineer.   **SEP, 2021 – Present**

Manual testing experience: Setmore and various answering service brands owned by AnywhereWorks.

- **Test Planning and Execution:** Created detailed test plans, cases, and strategies based on product requirements. Executed tests to ensure high-quality deliverables.
- **Team Collaboration**: Coordinated with internal and external teams from refinement to post-deployment checks. Ensured seamless integration and communication.
- **Cross-functional collaboration:** Worked with developers, product managers, and UI/UX designers. Facilitated collaboration to enhance software quality.
- **Tool Adoption**: Implemented test case management tool. Optimised testing processes and improved efficiency.
- **Bug Tracking Expertise:** Utilised JIRA for bug tracking and resolution. It ensured the timely identification and remediation of software issues.

Automation testing experience: Playwright.

- **UI Automation:** Implemented end-to-end UI tests using Playwright, developing scripts for user interaction simulation and robust UI element validation, ensuring optimal application functionality.
- **API Automation:** Utilised Playwright for API automation for REST APIs, executing tests to validate backend functionalities. Implemented systematic testing approaches such as schema validations, payload validations, and response code checks to ensure API reliability and data integrity.

Education

B.E. - Karpagam College of Engineering.   **2021**

Course: Computer Science and Engineering - With CGPA - 7.95.

Skills

Technical skills: Functional and Non-functional testing, Test automation with Playwright, JavaScript, Debugging and API testing.

Tools: Qase test case management software, JIRA and Postman.

Language: B2 level ([CEFR](#)).

Achievements

- Reduced feedback loops in testing by collaborating closely with developers and project managers, resulting in decreased bug occurrences and increased high-quality deliverables.
- Enhanced product quality by promptly addressing and reducing bug counts through proactive bug identification and efficient triaging.
